

CHAPTER 17

---

*Essential Unity*

Revelation, says the Tibetan Master, is truly the revelation of essential unity. This is the task of the Initiate. Unity must be revealed to special groups gradually and they themselves must reveal unity to the masses as much as their preparation permits.

The Initiate must have a ladder in front of his eyes and, step by step, conquer the step of revelation.

What is this step? The Initiate must realize that there is only absolute unity in manifestation. This is the essential unity everywhere, in everything. This concept must sink into his mind and consciousness and begin to manifest through his thoughts, emotions, actions, and motives. As he enters deeper layers of initiations, the concept of unity will deepen and involve him as a whole.

What is that ladder that he must build for himself? It is a plan of how, and in what gradient scale, he must reveal the concept of unity to the masses, to the intelligencia, and to the disciples in the world.

1. He must try in his daily life to express that *essential unity*, as naturally as the flowers grow, in his

- conversations
- relationships
- contacts
- judgments
- observations

If he succeeds doing this, he will contact the subjective and objective group of the New Group of World Servers, which is formed and works on the foundation of essential unity. He will live as a member of this group and demonstrate his understanding of essential unity in all his life-aspects.

2. The second step that he can take is to study the Kingdom of God, the Hierarchy, and see how on a higher scale They demonstrate the Principle and the Law of Essential Unity in Their activities, whether outer or inner. The life of the Hierarchy is a concrete example of essential unity, and not only an example but also an achievement.

The Hierarchy is composed of members of all races, of all nations, of all sexes, from all political and religious parties, from all scientific fields, from all traditions. The Hierarchy is a body of inspiration to move humanity forward in its evolution, and it represents all humanity.

Thus the Initiate emphasizes, first, the existence of the Hierarchy. The Initiate organizes those activities on the world scale that will impress on human

consciousness that the body of synthesis and unity exists in the subjective levels. When understood sufficiently, it will change the political, economic, and social systems into tools of unification, not tools of separatism.

The concept, the principle of essential unity will be amplified in all Initiates and they will eventually create such a pressure in the world that all activities, thoughtforms, and illusions based on separatism will shatter and be destroyed, revealing the essential unity of all that exists, and revealing the process of actualization and realization of the essential unity.

The Hierarchy absorbs all those who are demonstrating that *spiritual* quality of unity. It is this quality that is used by the Hierarchy as the cement of Brotherhood.

The essential unity will not stop expanding. It will expand to the Magnet of Shamballa, to the solar system, to the galaxies, to all that exists.

The revelation of essential unity of our earthly life will demonstrate the essential unity of all life — even in the space.

All Initiates in all seven fields of human labor will work towards it — all those who work in politics, in education, in philosophy or communication, in the arts, science, in religion, and economics.

Human suffering, pain, and even natural catastrophes are the result of breaking this essential unity in our consciousness, or of living a life that is separative and full of cleavages. When such illusions establish themselves in our consciousness, our consciousness operates

in a separative manner and disturbs the law of essential unity. This disturbance results in pain and suffering and natural catastrophes, which in the meantime are the methods of Nature to restore equilibrium.

One can imagine how much matter, energy, and how many lives can be saved by introducing the law of essential unity into all our activities, and how many possibilities can open to us to develop our potentials in a worldwide scale.

*“Verily, the happiness, joy, and bliss of humanity are based on understanding and actualizing the law of essential unity.” — M.M.*
